

## Press Release

### **HA12 CJ - Compact electric articulating boom**

Placing the client and innovation at the core of the company's mission, has enabled, the world's number 3 manufacturer of aerial work platforms, to develop a complete range of more than 60 models.

This drive to innovate gives rise to numerous new machines every year and makes Haulotte Group the specialist of people and material lifting equipments

This compact electric articulating boom is designed to meet all working requirements at 12m in congested areas. This boom is particularly suited for maintenance and repairs of electrics, lighting, air conditioning etc... Being narrow and compact this machine is ideal for working in industrial and logistic environments, and offers many benefits.

➤ **Compactness and handiness at all levels**

With only 2m height, the boom **HA12 CJ** can pass through standard doors. It is ideal for working in tight spaces with a width of 1.20m and a tight turning radius. The rotation of the turret and the arms are within the perimeter of the machine allowing it easy to use in small spaces.

➤ **Remarkable Accessibility and versatility**

Thanks to the vertical jib rotation of 70 °/ - 70 °, the compact electric articulating boom **HA12 CJ** enables operators to reach the most difficult working zones. This is a general purpose machine that can be used inside (up to 45 km/h).

➤ **High autonomy and easy to operate**

The **HA12 CJ** has high autonomy allowing long working cycles. The direct electric transmission system means less energy is required. The proportional and combined movements make the machine easy to operate.

➤ **Maximum productivity**

All these advantages result in excellent productivity and a profitability for the user (easy to operate, speed, reliability, etc.) with a maximum safety: the platforms **HA12 CJ** meets the requirements of the latest labour regulations, and also meets European standards (CE marking, EN 280).
