

Press Release

HTL 3614 Pro and HTL 3617 Pro Broadening the range of Telehandlers

By placing the customer and innovation at the core of the company's mission, this has enabled the world's number 3 manufacturer of aerial work platforms, to develop new technologies for our product lines which are safer to use and more innovative than before.

Designed to lift loads at a height of up to 14m on the new HTL 3614Pro and 17m on the new HTL3617Pro, Haulotte offers a new choice of application for telescopic lifting for construction and industrie. These two new machines, complete our existing, versatile range of Telehandlers, the HTL40-14 and the HTL40-17.

The characteristics of these new machines have been optimized to increase profitability by using standard parts and offer the best performance by keeping the leading features of the current range. This range is available under the name "Pro".

HTL 3614 HTL Pro and 3617 Pro

- **Maximum Performance and Versatility**

- Working zone has been optimized to ensure best performance, with a lifting capacity of up to 3.6 T for the 14m and 17m machines.
- Maximum versatility is assured with the full proportional hydraulic electronic control of the boom.
- A chassis levelling function as standard allows the machine to adapt to site conditions.

- **Power and Precision optimized**

- The standard hydrostatic transmission is coupled to a 93hp Deutz engine to ensure travel with maximum precision and power. This transmission allows for responsive, precise handling in slow or fast mode, depending on the operator input.
- Controls of movements of the boom and accessories are simultaneous and proportional with the exclusive use of "Flowsharing" technology on our already popular range HTL 4014 and 4017. This technology allows the operator to demand multiple movements simultaneously and without compromise.
- The single ergonomic controller, permits easy and comfortable use for the operator.

- **Better security and stability are exclusive**

- Blocking of rear axle, referring in terms of security, is installed as standard on **HTL 3614 Pro** and **HTL 3617 Pro**.
- Benefits from new safety features, including Auto cut-off of machine if it is placed in an unsafe condition.
